Headmaster's Welcome

The week started early, as it were, with a fantastic concert held in a vibrant and very well attended PAA on Sunday afternoon, reviewed below. The STEM theme was an opportunity to bring together an eclectic mix of music and the remarkable breadth of the offerings was a highlight, as was the sheer number of pupils performing, from right across the year groups. Our music department deserve huge praise and thanks for their hard work, and our pupils can be rightly proud of their excellent contributions to a wonderful evening's entertainment.

As the weeks fly by, we suddenly find ourselves at the beginning of a range of events for Christmas and the end of term! I look forward very much to the YSA Christmas Indoor Market this weekend. It promises to be a spectacular event with a vast range of stalls and activities, including Santa in his grotto, of course. The School, via support from the YSA, and a variety of local charities benefit from funds raised from the day: I hope to see you there.

Dr Huw Williams

STEM Concert

DATE: Sunday 17th November 2019

TIME: 18:00 hours

VENUE: Princess Alexandra Auditorium

EXPERIMENT: To create a musical nuclear reaction

VERDICT: Success!

As the sun set on a beautiful Sunday, Yarm School prepared for a scientific experiment like no other. Throughout our test, audience members witnessed spectacular performances from various ensembles including Brass Group, Flute Group and String Orchestra. Extraordinary chemistry was demonstrated in performances from Concert Orchestra, who performed a live piece of music backed up by incredible Music Tech engineered by Mr McIntyre, and the School Choir, who staged an out-of-this-world rendition of Aquarius-Let The Sunshine In from Hair.

We must give a special mention to the Aquarius STEM Staff Band, consisting of Mr McIntyre on Keys, Mr Williams on Guitar, Mr Reeve and Mr Yates on Saxophone, 'Birthday Boy Brogan' on Tambourine, Mr Mist on Trumpet, Mr Hibbard on Bass Trombone, Dr Prideaux on Drums and Miss Rooms on vocals. As well as being a star drummer, Dr Prideaux also performed his own composition to a piece of moving video on the piano, which received great praise from the audience.

In conclusion to our experiment, the performances received a great reaction from the audience thanks to the wonderful work of Mrs Staggs, the music department and everyone involved.

Now... onto Christmas!

Luke Porter

YSA CHRISTMAS INDOOR MARKET
THIS SATURDAY 10AM TO 4PM
SEE PROGRAMME INSIDE

Yarm School Mock General Election

We are now into our second week of campaigning; sound bites have been sculpted, manifestoes have been pored/pawed/poured over and policies spouted a plenty. One correction from last week – we also have the Yorkshire Party standing with Cameron Gray as the leader. My apologies for this omission last week, my editorial guilt only offset by the voluminous amounts of campaign material displayed by the Yorkshire Party – limits have now been set!

In a first hustings on Tuesday all of the parties' representatives faced a barrage of questions from an audience comprised of a wide range of age groups. Whilst expecting big numbers of Sixth Formers to turn out to support/challenge their peers, it was heartening to see a healthy number of First Year pupils, many very keen to ask questions of the parties. The session focused on 'Britain and the Wider World: Brexit, the EU and beyond'. On Tuesday Bakaer Noble defended the Brexit position to good effect, with Daniel Orlopp stepping in courageously to represent the Conservatives who were busy campaigning in the choir stalls!

The week also saw the leaders of the parties speak to each of the Junior and Senior Assemblies. Their faces are now known and they must now work hard to communicate their policies to the school community. This week the parties will be answering questions on 'Education and Youth' as well as 'Housing and the Environment'.

Mr S Edwards

National U19 Chess v Ampleforth

This week we took two teams of six to play Ampleforth A and B teams in the English Schools National U19 Chess first round qualifier. The teams were as follows:

Board	Yarm A	Yarm B
1	Yash Gulve	Yusuf Syed
2	AJ Thorne-Wallis	Avanish Batra
3	Edward Adams	Tenuk Mendis
4	Vignesh Janakiraman	Oscar Thomas
5	Shrish Nair	Max Mowbray
6	Aishani Paul	Natasha Pointon

The impressive venue was the Ampleforth College library and the games were actually played on tables made by Robert Thompson (The Mouseman). We played two head-to-head games with A v A and B v B. The B team won and lost their two games with a score of 3.5 – 2.5. The A team was victorious with winning margins of 4.5 – 1.5 and 5 – 1, and it is Yarm A who progress to the regional final to be played after Christmas.

We had a super mix of age groups represented in our teams, with special mention being deserved by our stalwart campaigners Yash and AJ, who led the proceeding with such commanding presence, winning both their games, as did Yusuf and Vignesh.

Mr M Pointon

Politics at the 'end of the line'

Last week Lower Sixth Politics students attended a student conference at the University of Hull. The university puts considerable effort into attracting people onto the campus in order to show off both the elegance of the surroundings as well as the considerable departmental strengths of staff in terms of teaching and research at this university.

The day began with an introductory lecture by Lord Norton, arguably the country's leading constitutional expert. Lord Norton had previously spoken at school to the Politics Society so it was good to become reacquainted with this eminent scholar and 'official historian of the Conservative Party'.

Students then split into so-called 'break out' sessions in order to explore a diverse range of topics in more of a university seminar style. Topics covered included 'War, what is it good for?', 'Green Politics', 'Losing Greatness: Britain's role in a post-Brexit world' and 'Political Skill: what is it and how do you get it?' The students received another lecture from the Director of the Hansard Society, Dr Ruth Fox, before the afternoon was closed out by a Question Time-style Q&A of local politicians, answering a diverse range of questions from the students. The whole day was an invaluable experience, certainly in terms of political exposure, but also in allowing students the opportunity to get the feel of a campus and the rhythm of university life.

Mr S Edwards

Book Review: The Rule of Law – Tom Bingham

In this book Bingham aims to dissect the notion of the rule of law which has become a term frequently used in the legal profession and an expression 'constantly on people's lips', as he puts it. Tom Bingham is considered to be one of the most prominent British judges and lawyers of his generation and he has extensive knowledge into the subject of law. Despite this, it is by no means directed at an audience of lawyers, and its accessibility to those outside of the field of law is a strong feature of this book. It makes use of detailed but simple explanations and captivating case studies to make it a fascinating read to a wide range of different audiences.

The first part of the book looks into why the rule of law is an important concept in society and looks at the various historical milestones reached before arriving at the present day, which range from the signing of the Magna Carta in 1215 to the Universal Declaration of Human Rights by the UN in 1948. In the second part, Bingham explores the individual components that he believes are integral to the rule of law when it is applied within a nation-state. These components include: accessibility, law not discretion, equality, exercise of power, human rights, dispute resolution, fair trial, and compliance with international law. Bingham elaborates each component with interesting case studies throughout the world and history such as the 1772 case of James Somerset that led to the abolition of slavery in Britain. These case studies are often tied with Bingham's own personal opinion of the subject giving a valuable viewpoint of an experienced judge to many different case studies across the world. The component, compliance to international law, is rather fascinating for its application of the rule of law to a global setting. This component evaluates the US invasion of Iraq in 2003, a very much relevant subject today with the conflict in the Middle East. Bingham examines this invasion for its compliance with international law, concluding that it did in fact breach the rule of law.

The third and final part of the book is perhaps the most intriguing in that it looks into the West's response to modern day terrorism and parliamentary sovereignty and analyses how well they obey to the rule of law. The analysis on terrorism is of particular interest as it brings to focus many of the civil liberties the UK and US government have been all too willing to sacrifice in the name of order and security in their war on terror. Bingham once gives his opinion on such matters, most notably in the increased use of surveillance by the UK government of which he describes us to be sleepwalking into a surveillance society as UK citizens have "become the most closely monitored people in the free world".

To conclude, Bingham provides an intricate definition to the concept of the rule of law that largely underpins the morals of a liberal democracy whilst at the same time bringing a thought provoking debate around the power we grant our government and the extent to which this power is abused. Overall I recommend this book to anyone looking to expand their knowledge into the subject of law.

Matthew Thambyrajah (U6 Politics student)

Maths Lecture trip (Extreme Value Mathematics)

On Wednesday 13th November, a group of 15 Fourth Year pupils visited Newcastle University to listen to a series of lectures lasting between 45 and 15 minutes, delivered on the subject of statistics, maths and physics. The first lecturer explained about calculating probabilities of natural disasters occurring and how the government calculate what to put in place to protect against these. We looked at storm Katrina, and how it was the 'Storm of the century' as there was a 1/100 chance of it occurring. When looking at sea surge heights in the past 60 years, the chance of a 14.4 feet height surge (Storm Katrina) was 0. But with the use of the Gumbel formula, we could calculate that there was actually a possibility of this occurring, and this was equal to 0.01.

The second lecture was about the topic of road safety and the probability of deaths in car accidents. He talked about using data in the favour of the argument (regression to the mean), explaining this with a dice simulation experiment where he proved that paper decreased the chance of rolling a six. He (on a computer simulator) took the person that rolled the most 6's out of 20 rolls, then asked them to roll 6's on a piece of paper and this was considerably lower. In one way this shows that rolling 6's is decreased on a piece of paper, but in fact it showed that information can be used in many ways as the person that rolled on the table was the highest scorer, but not also for the paper. This then related to research that speed cameras saved 300 deaths in a few years in a town, but in actual fact it was only 21.

The third lecture was talking about the SI units (kilograms, moles, Kelvin, candelas, amperes, seconds and metres). The woman speaking was explaining to us the definitions of these units, and what they represent. She was working on making some of these definitions easier to understand and shorter.

The final lecture was about 'what is the same', we were made to consider what was the same about a series of shapes, as in any experiments we need to consider what is the same and what is different. We can easily work out that {1,2,3} is the same as {1,2,3}. But is a blue circle the same as a red circle of the same size? Or is only a blue circle the same as a blue, identical, circle? She showed us many diagrams explaining how you can compare different shapes, which could be used for anything.

The trip was thoroughly interesting and we thank Mr Yates and Mr Addison for taking us.

Luke Porter and Lilian Dufton

Demand and Supply in the Real World

Another week... another full room of Sixth Formers keen to hear words of wisdom from another successful Former Pupil.

The Economics and Business department were this week delighted to welcome back once again Rachel Bradley (Class of 2014), who after A Levels in Economics, Maths and PE, went to Northumbria University to study Business Studies (a 4 year course with a 1 year work placement). Rachel has previously returned to Yarm to participate as a panellist for the FAME Careers Cluster.

Rachel once again engaged her audience, explaining how whilst at University she undertook a part-time job working at Red House School teaching Physical Education to Year 6 & 7 pupils. Whilst following on from this throughout University, she worked at a nursery in Hartburn looking after newborn babies to six year olds. For her work placement year she was lucky enough to secure a role in Supply Chain Logistics at Nissan which provided excellent experience for her first business related role. However, although she valued this placement, it made her appreciate how keen she was to work in a smaller organisation where she could have a more direct involvement in the direction the business took. Nissan did however give her a great platform to apply her skills and she went on to achieve a First Class Honours degree.

During her final year of University she secured part-time employment at Hellens Residential where she was subsequently offered a full time role once she graduated. Her official job title is Business Development Manager and she explained how her role consists of developing and collating bids and analysing new sites which they are interested in acquiring. The company purchase affordable homes on new build sites across the North of England and she has responsibilities which include negotiations, managing the company's cash flow and future planning of site acquisitions. Rachel has also just begun studying for her accountancy qualifications.

It was evident that Rachel is passionate about the business she works for and values working in a small, and growing organisation. She was happy to answer questions about her degree, Nissan and her current employment, as well as the housing market in general and I look forward to hearing the current Lower Sixth build this into their housing market presentations after Christmas.

We are very grateful to Rachel for taking time off work to come and speak to our students and we wish her all the best with her future career.

Miss C E Rhodes

Oswald Christmas Shoebox Appeal

Thank you so much for your generosity regarding this year's shoebox appeal. On Friday 81 shoe boxes were dropped off at the Tees Valley Community Church in Eaglescliffe in support of the Samaritan's Purse appeal. From there they will be sent to various locations around the world to help brighten Christmas of those less fortunate.

Next year we are hoping to support the Link to Hope appeal to target elderly and families in the local area with essential items.

Thank you for your on-going kindness.

Mr T Taylor

Hitler's American Friends

We are delighted to announce the date and theme of our next Friarage lecture. On **Tuesday 26th November** in the Friarage Theatre starting at 17:00, we will be joined via Skype by Professor Bradley W. Hart, Professor of History at California State University, Fresno.

Professor Hart has recently published a highly acclaimed work 'Hitler's American Friends: The Third Reich's Supporters in the USA'. The book won recent praise from the New Yorker and Time magazines.

Professor Hart will deliver a talk based around his research and the book and then take questions from the audience.

This talk is directly linked to the GCSE course and we would expect all pupils who have opted for GCSE History to attend the lecture. A letter will be sent home to all pupils in Fourth and Fifth Year about this with a reply slip for pupils to return if they are unable to attend the talk for a particular reason.

It is also of relevance to pupils in the Third Year who are studying Nazi Germany as well as all pupils with a general historical interest. Parents and friends of Yarm School are also most welcome. If you would like to attend please email ELP@yarmschool.org.

Mrs E Pinkham

Lego Mindstorms

We have used Lego Mindstorms to teach coding and robotics for many years and the original equipment which we bought in 2009 is used weekly for a coding activity.

We are starting to have some difficulty with the control units – one has no display screen and another frequently has connection problems. As the equipment is effectively almost obsolete we are unable to obtain replacements.

Do you have any Lego Mindstorms that you would be willing to donate to the school?

We are especially looking for NXT control bricks or more recent EV3 control bricks (pictured).

If you have any other mindstorms equipment (motors or sensors) we would also welcome those. Please contact Mr Foggett (tlf@yarmschool.org).

Thank You.

Mr L Foggett

Girls' U14A v Ashville	Won 3-0
Girls' U13A v Ashville	Lost 2-3
Girls' U13B v Ashville	Won 5-1

Rugby

U12A v Durham School on 14 Nov 19 (Won 35-15)

Yarm U12A team were ready to face Durham School for the first time this season, despite the cold and wet weather and a strong looking opposition. The first try of the game was at the 8 minute mark and was scored by Durham School against Yarm. Yarm soon recovered and after some great offloads and support runners, Harry Carter got the first five points for Yarm. Another try was scored by Yarm after Jake Leader and Tom Burchall gave some strong runs and the ball was touched down by Tom. Next the Durham players pushed through our defence and scored their second try, drawing the scores even and showing one of their strengths. After this, Jake Leader stormed through their defence at halfway and sprinted to the try line to end the first half with Yarm 15 - Durham 10.

At the beginning of the second half, Yarm showed a considerable improvement in their rucking skills and later on, some better communication abilities. However, Durham School still took the first try of the half after Yarm struggled with both their communication and tackling skills. This however didn't stop the team from pushing onwards towards victory. The team sustained pressure on Durham which led to Alex Carter to score another try for Yarm. Thirty minutes into the game, Jamie Elsworth dashed through the oppositions defence with ease and then it was just a few seconds before Yarm were ten points ahead. A chain reaction of brilliant passes later, and Ryan Mills was at the opposition's try line in the corner to put Yarm far in the lead. In the final play of the game Josh Davison shot past them with assistance from Tom Burchall to score the final try of the game making the final tally 35 - 15. After the match, Mr Collins awarded James Graham man of the match for his strength in defence and his excellent distribution of the ball in the match.

Josh Davison

U12B v Durham School on 14 Nov 19 (Won 50-15)

Last Thursday, the U12B team played against Durham School in match which had showcased an amazing display of strength, determination and speed from both sides.

The opponents played well with a number of their players having speed, but Ryan Mills and a number of other players scored try after try at the end the score was 50-15 to Yarm.

Muhammed Ibrahim

U12C v Durham School on 14 Nov 19 (Won 55-10)

On Thursday the 14th of November, our U12C team went to play Durham School. The match started with 3 spectacular tries, in which we utilised our stronger players to make space for our amazing backline to push forward and eventually score.

However Durham came back with two unforeseen tries. After 3 more easy tries for us, we decided that we wanted to challenge ourselves. So from that point on we had to have 3 rucks before we could score.

This new rule didn't stop us in the slightest. We proceeded to score 5 more tries and win the match.

This phenomenal victory was due to the marvelous communication between the boys that played that day and we hope to see this fantastic teamwork in other matches later in the term. Many thanks to Man of the Match, Ben Meager for carrying the team to victory. Outstanding work boys and keep it up!

Dheeraj Udupa

U12A v Pocklington School on 16 Nov 19 (Lost 20-30)

For the second game since returning from half term, we made the exciting journey to Pocklington School near York. It was a pretty tough game as we only had 10 players and no substitutes.

Pocklington, on the other hand, appeared strong scoring at the 1st, 2nd, 7th, 13th, 14th and 19th minutes of the first half of the match. We were unlucky not to score in the 17th minute as there was a great run by Joseph Belch.

In the second half our defence tightened and we conceded no tries. Improving our attacking too, we scored 4 tries-

- In the 22nd minute by Alex Carter with astonishing line support.

SPORT

- Then just 4 minutes later Joseph Belch held great depth from out wide in space and scored another great try helping the team massively.
- Very close after, Harry Carter had a wonderful strong finish after an outstanding line break by Jake Leader.
- As the game had only 6 minutes left, Jake Leader had another storming line break, scoring the last try of the game.

After a wonderful performance from Jake Leader he was awarded Man of the Match for great strong running.

Tom Burchall

U12B v Pocklington School on 16 Nov 19 (Won 40-0)

On the 17th of November, we travelled to Pocklington School near York to play their under 12B team. It was a great match that we won with five different try scorers; Ryan scoring three, Sam scoring two, Alfie and Will both scoring one try each and Theo scored his first of hopefully many tries for our brilliant squad. It was an all round team effort and we could not have won without each dedicated team player.

Thanks to our strong defence and our amazing forwards, we kept a clean sheet winning 40-0. Ryan Mills was chosen for Man of the Match after scoring fifteen points, a great personal contribution to our final points total.

After the match, we enjoyed the kind hospitality of Pocklington School.

Noah Barron

U18B/2nd XV

This was a cracking fixture and one that saw both teams play a good game of rugby; evenly matched and with the chance to mix things up a bit. We had a really good blend of players from across all three senior year groups. In a game that was tight all the way through, it was credit to the players for the ambition they showed. We looked to attack space where we could and the players adapted to the challenges of this particular game by varying how and where they looked to attack. Smart handling and fixing defenders created space for two of our tries to be run in from distance with great skill by captain Sol. Another try was a result of territory and pressure and playing cleverly in behind until using the space tight to the breakdown yielded a score.

In the end, a top game was decided by a small margin; as they often are. Some good individual performances on the day but also a solid effort from the boys as a team.

U13B v Pocklington School on 16 Nov 19 (Won 45-15)

On Saturday, 16th of November Yarm U13 travelled to take on Pocklington. The game began with some excellent tries scored by Oscar Shaw and Harry Jackson. Yarm kept piling on the pressure through direct runs from Jack Stoddard. Yarm were using strong forwards such as Yassen El Hegab and Yusef Syed to clear out the rucks, whilst the fast backs made lots of breaks to nearly score again. In the last few minutes Pocklington scored twice, but the final score was 45-10 to Yarm! The team played very well and everyone worked their socks off and were rewarded with a good victory. Well done boys !

CHILDREN'S ENTERTAINMENT

There are lots of children's activities this year...

Crafty Corner - Riverside Classrooms

Decorate Christmas tree decorations or make a unique angel for the top of your tree!

Christmas Games - Riverside Classrooms

Ring the Reindeer, Snowball in the Bucket and Feed the Snowman

Rudolph Rodeo - Dance Studio

Can you ride the Rudolph Rodeo and top the leader board?

Children's Tombola - Dining Hall

The Children's tombola is always a popular stall - get there early!

Pocket Money Stall - Dining Hall

Not sure what to spend your pocket money on? Come along to the YSA Pocket Money Stall.

Santa Express to Santa's Grotto - Auditorium Basement

Ride the train to Santa's magical grotto, meet Santa and receive a gift - it is a wonderful experience!
